St. Joseph, Michigan. – The American Society of Agricultural and Biological Engineers (ASABE) has named the SpectroClick AAH-300 visible spectrometer winner of a 2017 AE50 award.

AE50 awards honor the year's most innovative designs in engineering products or systems for the food and agriculture industries. The AAH-300 will be featured in the January/February 2017 special issue of ASABE's magazine *Resource: Engineering & Technology for a Sustainable World*. For more details visit [www.asabe.org/AE50](http://www.asabe.org/AE50)

Alexander Scheeline, President of SpectroClick, says, "We are pleased and honored to receive this award. We have targeted agriculture as one of our major markets, so being recognized as an innovator for this community is particularly gratifying." He continued, "We are bringing affordable chemical analysis to users who want action recommendations, not just measurement details."

Companies from around the world submit entries to the annual AE50 competition and up to 50 of the best products are chosen by a panel of international engineering experts. The judges select innovative products that will best advance engineering for the food and agriculture industries.

The AE50 awards program emphasizes the role of new products and systems in bringing advanced technology to the marketplace. These engineering developments help farmers, food processors and equipment manufacturers increase efficiency, enhance quality, improve safety, and increase profits.

*Resource*, a magazine geared to agricultural, biological and food system engineers worldwide, is produced by ASABE. The magazine is read by thousands involved in the agricultural, food and biological industries. Read more at [www.asabe.org/Resource](http://www.asabe.org/Resource).

ASABE is an international scientific and educational organization dedicated to the advancement of engineering applicable to agricultural, food, and biological systems. Further information on the Society can be obtained by visiting [www.asabe.org/](http://www.asabe.org/).
